

# Avigilon Presence Detector Firmware Release Notes

## **Version 4.18.0.36 – Released Jul 16, 2021**

### **New Features**

- This release enables configuration option on the WebUI to trigger APD's digital output based on presence or dwell time. This setting can be configured in the "Digital Inputs and Outputs" tab from the WebUI.
- Added functionality to reset APD's dwell time based on an external digital input. This functionality can be enabled by checking the "Reset dwell on input" option in the "Digital Inputs and Outputs" tab on the WebUI.
- Support added for TLS (Transport Layer Security) v1.3

## **Version 3.18.0.36 – Released Jan 16, 2017**

- Resolves a privilege escalation issue for operator and user accounts where HTTP or CGI commands are being executed as an administrator account. We highly recommend all users to update to this release.

## **Version 3.18.0.26 – Released Oct 16, 2017**

- Initial firmware release
