

# Avigilon H5M Camera Line Firmware Release Notes

## **Version 4.12.0.68 – Released Jan 9, 2023**

### **Issues Fixed**

- Fixes a firmware certification issue that could potentially cause ACC 7.14.10+ to reject the camera's firmware if downloaded from the Avigilon website

## **Version 4.12.0.66 – Released Oct 14, 2022**

### **Issues Fixed**

- Fixed a rare issue that caused the camera not to adjust to Daylight Savings Time when located in the GMT +2:00 time zone (one-off incident)

## **Version 4.12.0.60 – Released Jun 7, 2021**

### **Issues Fixed**

- Addresses an important security issue. Avigilon customers are advised to take this upgrade
- Fixes an issue where the bitrates of the camera's video streams could sometimes exceed the value that was configured via the Max Bitrate setting

## **Version 4.12.0.14 – Released Dec 2, 2020**

### **Issues Fixed**

- Fixed several issues with the operation of the IP access filtering list

## **Version 4.12.0.14 – Released Dec 2, 2020**

### **Issues Fixed**

- Fixed several issues with the operation of the IP access filtering list

## **Version 4.12.0.10 – Released Nov 27, 2020**

### **New Features**

- Added support for IP address access filtering on the camera. Users can now configure an IP access grant/block list from the camera's WebUI
- Support added for TLS (Transport Layer Security) v1.3

### **Issues Fixed**

- Minor bug fixes

## **Version 4.0.0.18 – Released Jan 25, 2020**
