

MOTOROLA SOLUTIONS ACCESS CONTROL MANAGER (ACM)

INTRUSION PANEL INTEGRATION

Control and monitor intrusion panels directly from within ACM™ and benefit from increased security, improved accuracy and quicker verification of intrusion events via live video triggers. With an integrated system, users can monitor intrusion and access events from a single location for better situational awareness and faster response.

AREA MONITORING AND CONTROL

(Dis)arm areas from ACM and monitor their status, including armed, disarmed and alarmed.

INTRUSION WORKFLOW AUTOMATION

Create custom links between your intrusion objects (panels, areas, points/zones and outputs) and ACM, and automatically issue commands to your access control devices based on intrusion events using Global Linkages and Actions.

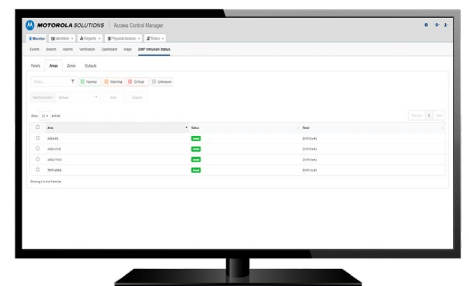

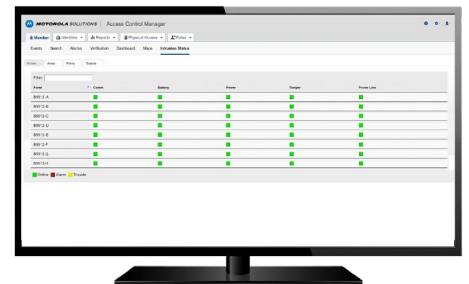

PANEL HEALTH MONITORING

Monitor panel statuses, including communication, battery level, power, tamper, phone lines, printer and more.

QUICK FILTERING

Filter items by their criticality and identify those requiring immediate attention.
