

Motorola Solutions Bluebeam Revu Tool Chest

Streamline your security design workflow

Accelerate your security design process with Motorola Solutions Bluebeam Revu® Tool Chest. Create and visualize designs, generate accurate bills of materials and collaborate seamlessly with your team, leading to more efficient physical security system implementations.

Avigilon symbols

Quickly and accurately design your security system layout by dragging and dropping 2D orthographic symbols for Avigilon cameras and environmental sensors directly onto your plans.

Scalable field of views

Easily confirm camera coverage by visualizing the selected camera's field of view, making it simple to assess worst-case scenarios.

Legend generator

Get a clear security system design overview with an automated legend that populates symbols, customizes camera specs and includes detailed documentation.
