# Avigilon Developer Community

Where integrations unlock limitless possibilities

# Join the Avigilon Developer Community

Organizations today require efficient workflows across their technologies. To optimize security, eliminate inefficiencies and lower costs, they need integrated systems that can work together in harmony.

The Avigilon Developer Community fosters collaboration among third-party developers, hardware vendors and service providers. It provides direct access to Avigilon's support and resources, enabling high-quality technology integrations that expand current security solution capabilities, enhance product offerings and address evolving global organizational needs.

## Develop

Build custom integrations using intuitive APIs. Avigilon's comprehensive portfolio of video security and access control solutions are designed for seamless interoperability with third party software and hardware.

## Innovate

Collaborate with developers, share valuable feedback and access demo licenses, training and comprehensive testing guidelines. The Avigilon team is here to provide ongoing support and resources, maximizing integration success.

## Grow

Unlock new opportunities and open doors to a wider market by integrating third-party technologies with Avigilon systems. Create solutions that deliver greater value, seamless integrations and a smooth user experience for customers.

## Avigilon's open platform solutions

Avigilon's open platform solutions enable integration with third-party systems, allowing customers to use existing investments, easily scale their security and create customized ecosystems that improve operational efficiency and safety.

[Join the community](#) and shape the future of physical security. Together, we'll develop innovative solutions that drive real value for our customers.

# Unlock your integration potential

## Empowering third-party integrations with Avigilon

Are you a software vendor or development services provider looking to integrate with Avigilon solutions? The Avigilon Developer Community is your one-stop resource for success.

Explore the benefits of joining the Avigilon Developer Community:

### Benefits of joining

- **Exclusive access to resources.** Gain access to comprehensive documentation, APIs/SDKs and development tools available exclusively to community members. Access a library of informative videos that provide developer how-to's and guidance using our APIs.
- **Expert guidance.** Receive technical assistance and guidance from Avigilon experts.
- **Collaborative learning.** Engage in discussions and knowledge sharing within dedicated developer groups. Stay up-to-date with the latest trends and best practices in the industry.
- **Streamlined integration process.** Request a demo license to thoroughly test your integration before launch. Benefit from clear testing guidelines and an easy self-certification process.
- **Direct impact.** Influence Avigilon's platform evolution by contributing feature requests and integration ideas.
- **Enhanced visibility.**
  - Gain exposure to a wider audience through a listing on [avigilon.com/integrations](https://www.avigilon.com/integrations) and enhance your brand awareness through a feature in our internal, partner and end-user newsletters, reaching influential stakeholders within Avigilon's expansive network.\*
  - (Avigilon Alta integrations) Get your technology in front of 20,000+ potential customers by listing it in the Avigilon App Marketplace.

\* To be eligible for a listing on [avigilon.com/integrations](https://www.avigilon.com/integrations) and feature opportunities in our newsletters, your integration must meet specific requirements.

# Tailored community benefits

The Avigilon Developer Community is designed to empower developers and collaborators with valuable resources and opportunities. Joining is free for both groups, providing access to essential tools and integration support. The following table summarizes Avigilon's benefits by group.

BENEFITS	COMMUNITY GROUP	
TECHNICAL	DEVELOPER	COLLABORATOR
	Enables self-service creation of integrations with API/ resource access and minimal support.	Active engagement and promotional collaboration are required for full partnership benefits.
