

Avigilon Halo 4 Smart Sensor

Smarter insights in any environment

Add an extra layer of security anywhere, even in privacy-sensitive locations. The Avigilon Halo 4 Smart Sensor is an intelligent, multi-sensor device designed to help maintain a safer environment. Integrate with Unity or Alta Video for fast setup and improved threat detection.

Smart security anywhere

Address safety and security concerns with the Halo 4 Smart Sensor. Detect events like smoking, vaping, loud noises, air quality, environmental changes, and occupancy¹ for proactive protection.

Advanced audio features

Detect threats even when visuals are unavailable. Advanced audio analytics detect screams, gunshots, and other sounds, with two-way communication enabling fast response.

Tailored alerts

Create personalized thresholds for parameters that matter to you. Meet specific safety or operational needs, ensuring highly relevant and tailored outcome alerts.

Real-time insights

Make fast, informed decisions with easy data visualizations and historical reports². Quickly understand situations and take action to improve safety and operations.

Customizable LED notifications

Enhance safety protocols with customizable LED ring lighting, configurable in a wide range of colors for immediate visual notification and response during emergencies.

Secure & compliant

Keep your data safe. FIPS 140-3 level 3 and secure boot provide advanced cybersecurity, ensuring compliance and protection.
