

Alta H6A Fisheye

One camera, 360° cloud coverage

Maximize visibility in indoor and outdoor spaces with the Alta H6A Fisheye camera. Improve incident response with 360° panoramic views and AI-powered analytics. Its wide perspective helps reduce the number of cameras needed while connecting directly to the cloud to simplify your setup.

360° panoramic views

See more across expansive environments with a wide field of view. This helps eliminate coverage gaps and reduce the total number of cameras required, helping lower installation costs.

Continuous sight

Maintain views of people even when they pass directly beneath the camera. While most lenses lose subjects in the center of the room, this fisheye camera helps to provide a constant view.

Faster incident response

Detect and classify people and vehicles across the entire scene. AI-powered video analytics help your team find specific details and receive smart alerts to help resolve incidents quickly.

Sound-based risk detection

Identify risks using a built-in microphone that can flag sounds like screaming or breaking glass. These alerts help your team check the area and act with more certainty to help keep people safer.

Simple cloud deployment

Connect directly to the cloud to streamline your setup. This approach helps to reduce your reliance on extra hardware and makes it easier to manage your security from anywhere.

Rugged and reliable

Deploy in challenging environments with a durable design featuring IK10 impact and IP66/68 weather ratings. This camera is built for long-term value and includes a warranty of up to 10 years.
