

Unity H6A Closed Dome

Seamless design, uncompromised safety

For high-risk environments such as correctional facilities and healthcare, the Avigilon Unity H6A Closed Dome camera offers robust protection and reliable performance. Its design tackles issues like contraband concealment and tampering, which can help improve safety for all.

Seamless, gap-free design

Reduce safety risks and prevent tampering by minimizing spaces where contraband can be hidden. This also makes it harder to attach unauthorized items, which can further improve security.

Take on any environment

Enjoy reliable protection everywhere. Rated IK10/11, IP66/68, and NEMA Type 4X, this camera withstands impact, water, and various elements, helping to ensure a dependable security system.

AI-powered video analytics

Gain intelligent insights into your site's activity through built-in video analytics. These can alert you to unusual crowds, abnormal behavior, and potentially critical events.

Audio analytics & recording

Attain insights with alerts for sounds like screaming or glass breaking. You can then review video from the triggered camera to investigate, with the option to record audio when needed.

Low-light clarity

Capture every moment in low-light conditions. The split IR dome helps provide 24/7 visibility, even with dust buildup, which can help reduce the frequency of maintenance visits.

Protected & compliant

Achieve peace of mind knowing your data is secure with advanced cybersecurity features, including FIPS 140-3, onboard TPM, and Secure Boot, which help you maintain compliance.
