Avigilon Unity Developer Community

Where integrations unlock limitless possibilities

Join the Avigilon Unity Developer Community

Today's businesses demand seamless, unified workflows across their technology landscape. To deliver the highest level of security, safety and operational efficiency, they need solutions that work together seamlessly.

That's where the Avigilon Unity Developer Community comes in. We're bringing together the brightest minds in the industry to create a collaborative community where third-party developers, hardware vendors and service providers can work alongside Avigilon. Together, we'll build innovative integrations that unlock the full potential of Avigilon Unity, our powerful on-premise platform that combines video security, access control and flexible cloud management in one centralized solution.

Integrate

Build custom integrations using our intuitive REST APIs. Our comprehensive portfolio of video security and access control solutions are designed for seamless interoperability with third party software and hardware.

Innovate

Collaborate with other developers, share valuable feedback and access demo licenses, training and comprehensive testing guidelines to ensure your integration is a success. Our dedicated team is here to provide ongoing support and resources, maximizing your integration success.

Grow

Unlock new opportunities and open doors to a wider market by integrating your technologies with Avigilon's powerful on-premise systems. Create solutions that deliver greater value, seamless integration and a smooth user experience for your customers.

Join our community and shape the future of physical security. Together, we'll develop innovative solutions that drive real value for our customers.

Unlock your integration potential

Empowering third-party integrations with Avigilon

Are you a software vendor or development services provider looking to build integrations with Avigilon Unity Video and/or Avigilon Unity Access? The Avigilon Developer Community is your one-stop resource for success.

Connect with a thriving community of developers dedicated to integrating with Avigilon solutions.

Benefits of joining

- **Exclusive access to resources.** Gain privileged access to comprehensive documentation, APIs/SDKs and development tools tailored specifically for our community members.
- **Streamlined integration process.** Request a demo license to thoroughly test your integration before launch. Benefit from clear testing guidelines and an easy self-certification process.
- **Enhanced visibility.** Gain exposure to a wider audience through a listing on [avigilon.com/integrations](https://www.avigilon.com/integrations) and enhance your brand awareness through a feature in our internal, partner and end-user newsletters, reaching influential stakeholders within Avigilon's expansive network.*
- **Direct impact.** Contribute to the evolution of Avigilon's platform by submitting API feature requests and integration ideas.
- **Expert guidance.** Access a library of informative videos that provide developer how-to's and guidance using our APIs.
- **Collaborative learning.** Engage in discussions and knowledge sharing within dedicated developer groups. Stay up-to-date with the latest trends and best practices in the industry.
- **Online training.** Receive access to a customized online learning path focused on key Avigilon product functionality to help support your integrations.
- **Dedicated support.** Receive technical assistance and guidance from Avigilon experts.

* To be eligible for a listing on [avigilon.com/integrations](https://www.avigilon.com/integrations) and feature opportunities in our newsletters, your integration must meet specific requirements.

Seamless interoperability with third-party cameras

Avigilon is committed to effective interoperability. As a member of ONVIF®, the global forum for standardizing interfaces in IP-based physical security, we ensure our products work seamlessly with other systems.

Our fixed camera video security portfolio and Avigilon Unity Video, our AI-powered video management software (VMS) with cloud-managed capabilities, are designed for smooth integration with third-party software and hardware. Avigilon Unity Video supports any ONVIF camera compliant with Profiles G, S and T, allowing integration with tens of thousands of third-party cameras.

We even utilize ONVIF standards when integrating our own cameras with our VMS, highlighting our commitment to open and interoperable solutions.
