

One Platform. Unlimited Opportunities.

What is Immix?

Immix is a browser-based, open-architecture software automation platform connecting disparate systems into a single easy-to-use interface designed for companies providing monitoring solutions who are looking to expand their suite of managed video services.

Key Features and Benefits

- Optimize your operations, enhance operational and cost efficiencies, and improve scalability.
- Largest integration portfolio in the industry.
- Flexible and secure access through a web browser or mobile app.
- Simplify IT deployments reducing administration and management costs.
- Customizable interface can be tailored to your brand.
- Immix Dashboard delivers an information-rich snapshot of key metrics and statistics for your operation at a glance.

The Immix Difference

Immix is a well-known and respected figure in the security and monitoring industry, boasting robust and long-lasting partnerships with some of the industry's largest players.

With several past customers now part of the Immix team, we possess a distinctive comprehension of the client's viewpoint. This invaluable insight empowers us to function as trusted advisors to our clients, guiding them in developing service offerings and sales strategies. Our customers rely on us to equip them with the essential tools and support needed for their continued success and growth.

The Platform of CHOICE. The Partner you TRUST.
