

Streetlight-mounted ENVR2X

Unified security for simplified deployment.

Upgrade your city's infrastructure effortlessly with the Motorola Solutions' ENVR2X. This multi-functional edge-appliance directly mounts onto streetlights, combining Network Video Recorder (NVR), video management software and camera support in one unit for faster deployment. It's an all-in-one solution that enhances public safety and operational efficiency with minimal disruption.

All-in-one design

Combines Avigilon NVR, Unity Video and supports up to four cameras in a single unit, simplifying installation and management.

4G connectivity

Integrated high-speed 4G connectivity allows for rapid deployment on any streetlight, eliminating costly trenching and reducing installation times from months to days.

Streamlined deployment

Mounts directly on street lights, reducing costs and accelerating deployment.

Outdoor durability

Robust build for outdoor, pole-mount deployment for public safety and commercial use.
