## Honeywell Galaxy intrusion panels integrated into Avigilon Unity

**AVIGILON**™ TECHNOLOGY  
INTEGRATIONS PARTNER

### TOP BENEFITS

- This integration improves the user experience through the new graphical interface to manage devices from different technologies (CCTV and intrusion) working together.
- Real time forensic analysis in ACC after receiving an intrusion alarm.
- Seamless interface to retrieve data from the intrusion panel in ACC saving time to users.
- Light software development to be installed on a workstation or any server with Windows OS reducing significantly cost deployment for the CCTV and intrusion integration.

Bidirectional integration of Honeywell Galaxy (both Dimension and Flex) intrusion panels into Avigilon Unity software platform to combine CCTV and intrusion.

### TOP FEATURES

Graphical interface to manage and monitor intrusion devices status with related cameras.

Capability of triggering alarms into Avigilon Unity after receiving intrusion alarms through the integration.

Expanding the appearance search scope of action to track intruders in real time through cameras linked to intrusion devices after receiving an alarm (i.e., when somebody opens the emergency exit door).

### VALUE PROPOSITION

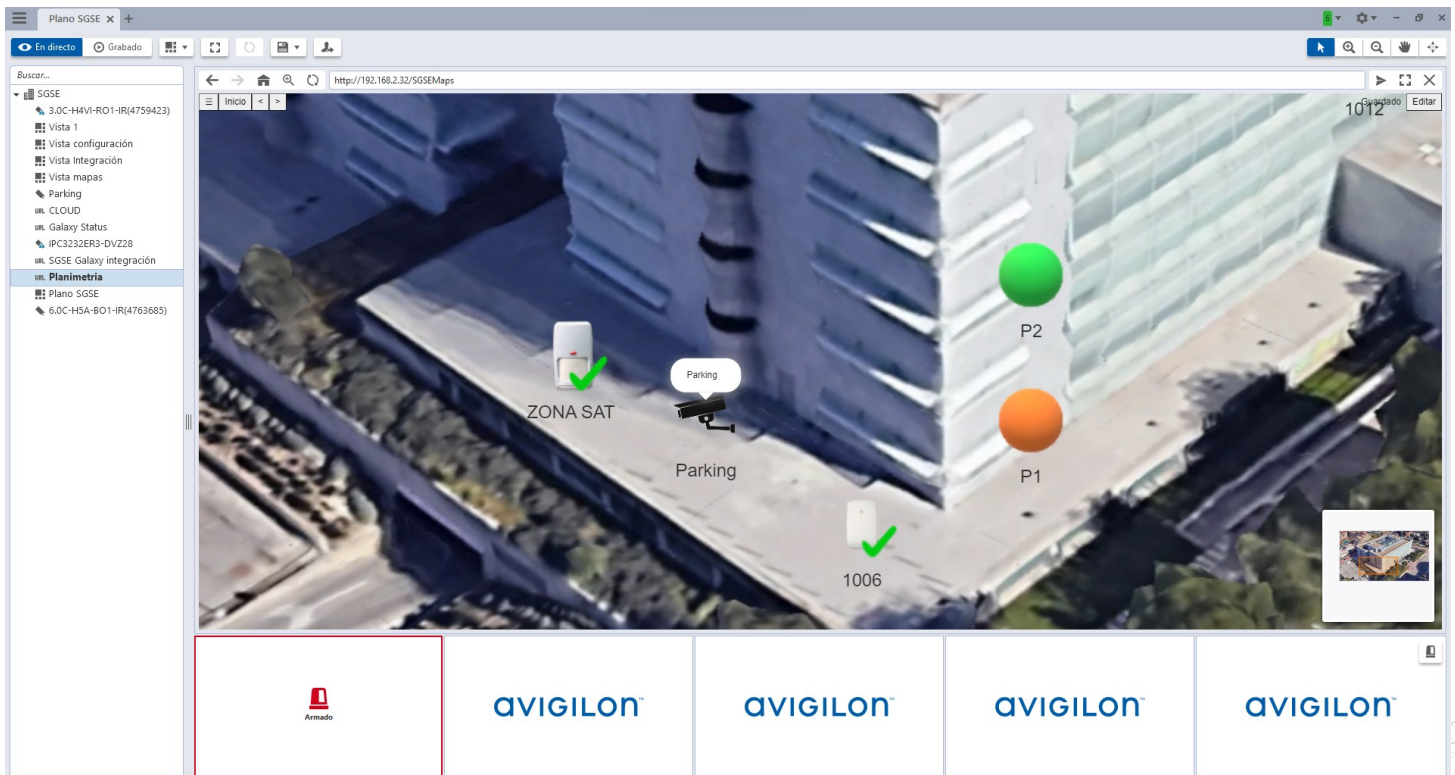

This integration moves Avigilon Unity from a powerful VMS to an outstanding integration platform to manage CCTV and intrusion through the same software platform in a graphical interface, receiving alarms of both technologies and expanding the appearance search to cameras linked to intrusion devices.

### REGIONAL AVAILABILITY

Global

### VERSION OF ACC TESTED

7.14.22.2 (build 1680296996)
