

Taking Perimeter Security to a Whole New Level

Avigilon VMS

Integrating Spotter Global
with Avigilon

Preventing Harm

Benefits of Avigilon VMS:

- Avigilon High Definition Stream Management (HDSM)™ technology preserves video image integrity while intelligently managing bandwidth, giving high image quality and maximum coverage.
- Offers a broad range of megapixel cameras - from 1 MP to 7K (30 MP) - that deliver clear image quality.
- Avigilon Control Center (ACC)™ software provides complete control of video playback providing remote accessibility when needed. Find scene changes, missing objects and events to quickly retrieve evidence.
- ACC video software can manage an unlimited number of cameras. ACC software has the ability to add multiple offices, buildings, or locations.
- A single Avigilon surveillance camera can replace multiple VGAs.

Benefits of Spotter Global:

- Reduce false alarms from 100's or 1000's per day to a near zero level
- Detect and track multiple intrusions at once
- Every target is Geo-referenced in real time
- Use less equipment to cover 1 to 100+ acre critical sites
- Detect human or vehicle activity in fog, rain, snow, sand, hot, cold and day/night conditions with equal performance
- Customize radar coverage with zones of varying levels of interest and security
- Save time on install and setup costs by installing on existing infrastructure

NOTE: Requires NIO 4.9+ and Avigilon Control Center 7+

Value of Avigilon - Spotter Global Integrated:

- Eliminates the need for more than one screen per security solution.
- Drastically increase value of cameras by using SpotterRF's "slew-to-cue" effective target tracking
- Spotter tells the camera when/where to look with no need for human intervention
- Plug and Play driver for Avigilon into SpotterRF's NetworkedIO radar management system
- Single "pane of glass" experience of live video and radar feeds at every radar alert.
- Immediately alert and confirm operators of an alarm, only when there is actually something of interest happening on your site
- Save cost by installing less equipment and covering more area 24/7

"There have been numerous arrests made and thousands of dollars saved in theft/vandalism as a result of this high-tech monitoring system. In our experience there is no better option than this reliable radar tracking system." -David A. Cummings, Sr. Vice President, Broken Arrow Inc.

NOTE: Requires NIO 4.9+ and Avigilon Control Center 7+
