AVIGILON™

AVIGILON UNITY ACCESS MOBILE APP

Manage Access To Facilities Anytime, Anywhere

This intuitive app extends the power of Avigilon Unity Access on mobile devices, empowering operators to manage access to facilities and respond to critical events anytime, anywhere.

PURPOSE-BUILT FOR UNIVERSAL USE

An easy-to-set-up and practical app for operators to use without formal training. The content of the app is defined and managed by the administrator to fit your facility's needs.

FLEXIBLE ACTIONS

Quickly search for a global action, door, or identity and perform actions while on the go. Customizable content options and the ability to populate your favorites lists allow for easier access and better app organization.

ACCESS MANAGEMENT

Designed to perform daily operations swiftly and respond to critical events at any time. With advanced mobile technology at your fingertips, you can take greater control of access into a facility to help protect your people and property.

SIMPLE LOGIN

Your mobile device remembers your information and login credentials for a seamless login process.
